DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities:

Perhaps applicant should add –a temperature sensor is provided within said casing, — after “the aircraft,” in line 4, because, since the temperature-measuring device “consisting of” (comprising only) a single wedge casing, it is not clear what particular structure is responsible for total temperature measurements. Appropriate correction is required.

Allowable Subject Matter

2. Claim 1 is objected. Claims 2-5 are allowed.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO-892 and not mentioned above disclose related devices and methods.
